Greenhouse Gas Match-Up

Where Are All the Greenhouse Gases Coming From?

Instructions:

On the next page:

Use a pencil to draw a line between each of the greenhouse gases on the left and the things they come from on the right. Be careful! Not all of the gases on the left are greenhouse gases. Each greenhouse gas may come from more than one thing.

Do you know which things in nature greenhouse gases come from? Circle the pictures of all of the natural sources of greenhouse gases. (Hint: you should circle 3 pictures.)
